

Carnegie Mellon Data Science Club (DSC)

Get Involved!

- **DSC Mailing List** - important information & monthly newsletters
- **DSC Discord Server** - connect with other club members
 - event details/updates posted
- **Tartan Connect** - official member of the club!
- **Instagram** - be featured & keep up with the board
- **Facebook Group** - event details posted
- **Website** - general information

DSC Events

Workshops

- Typically geared towards beginners
- Some possible topics:
 - Data Visualization
 - Data Exploration and Analysis
 - Machine Learning
 - Computer Vision
 - Natural Language Processing
 - SQL
- Become a workshop leader! (Come talk to us)
- This year:
beginning/intermediate/advanced topics?

Kaggle Competitions

The screenshot shows the Kaggle interface. On the left is a sidebar with navigation links: Home, Competitions, Datasets, Code, Discussions, Courses, More, Recently Viewed (Contradictory, My Dea..., Predict Future Sales, Tabular Playground Se..., optiver_nn), and View Active Events. The main area displays a competition titled "NFL Big Data Bowl 2022". The title card features a stylized mountain-like graphic with the text "Analytics Competition", "NFL Big Data Bowl 2022", "Help evaluate special teams performance", "The National Football League • 3 months to go", and "\$100,000 Prize Money". Below the title card are tabs for Overview, Data, Code, Discussion, Rules, and an ellipsis. The Overview section contains descriptive text about special teams in football and the purpose of the competition. It also mentions the use of NFL's Next Gen Stats (NGS) tracking data from 2018-2020 and PFF scouting data. The text highlights the NFL's history and its commitment to advancing the game.

- Introduction to Kaggle workshop
- Work on Kaggle competitions in a team with other DSC members!
- Mentorship and guidance provided
- Learn about data science and have a chance to win a cool prize!

Community

- **Socials:** Come connect with others
 - FOOD
 - We want to spend money on you!
- **Mentor/Mentee** program
 - Build relationships with the board
 - Meet once/twice a month
 - Kaggle competition
 - Send out interest survey next week
 - Chat with all of us today!

Talks/Lectures

- We invited Hadley Wickham, Chief Scientist of RStudio, to CMU to talk in 2019!
- **UPCOMING Feb 7:**
 - Interview with Nick Singh (created Ace the Data Science Interview book)

* We had more than 100 attendees ranging from undergrads, grads, phDs, and professors.

Photos :D
